

*Adorn your stateroom with a **Sapphire** !*

*Introducing the new
Tempwise Sapphire*

***Digital Room Thermostat
from Aqua Air***

Beauty can be more than skin deep >>>>>

The challenge !

Since Aqua Air was the first company to manufacture chilled water air conditioning systems for the luxury yacht market, it was only natural we lead the way in digital room thermostats.

To date, the digital controls offered by Aqua Air and it's competition have been rather unsightly, bulky and lacked the electrical circuitry to handle more than two or three 16,000 BTU/H draw through style fan coils, which have become the yacht builders fan coil of choice.

Owners and interior decorators dealt with the aesthetic issue by hiding the thermostats from view and yacht builders concerned with the cost of these controls, challenged us to come up with a better solution to the electrical circuitry limitations.

The answer....

Sapphire™ *Aesthetic Appearance*

Recognizing the fact that we are not interior designers, it made sense to leave that task to the specialists. Therefore, we designed the Sapphire to receive the Vimar® Idea series and Ticino® Living Art bezels. Both of these brands of bezels are available in a wide array of colors and textures. Naturally, the Sapphire blue LED inspired the name !

*Vimar® Idea series and Ticino® Living Art bezels.
A vast array of colors and wood grains to choose from*

Some of the technical features of the fully programmable Sapphire™

- * *Sapphire blue LED with brightness control*
- * *Highest fan circuit rating in the industry*
- * *Will control up to six Aqua Air 16KBTUH Whispercoils™*
- * *Field replaceable fuse protection*
- * *Dual voltage capability*
- * *Modular plug connection for high and low pressure switches*
- * *Display cables are 50% smaller in diameter than the competitions making routing a snap.*
- * *Uses less bulky 4 pin plugs instead of the competitions 8*
